

Ortex™ COLOR COAT By TEXSTON

Texstōn is a high performance plaster products company, after achieving tremendous success Texstōn Industries introduces this unique stucco color coat with a price point that is only 10% to 15% price increase from conventional Stucco color coat. Ortex has superior characteristics that add strength and flexibility as well as tremendously reducing the appearance of cracks in the color coat. (When going over acrylic modified cement - base and mesh - use about 24oz. of admixture per bag, Texston RPA or Acryl 60).

Features:

- Crushed angular Carbonate mineral rock * Interlocking of the individual stones

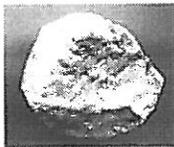

- * Promotes flexibility and durability
- Washed baked super clean sand
- Hydrophobic * Promotes water-repellency and water-retention
- Micro Fibers *Invisible, minimize shrinkage/ cracks, promoting water-retention and flexibility
- Dry polymers *Promotes a stronger bond, flexibility and water-repellency
- Using Iron Oxide powder pigments *Promotes color fade resistance
- Water-Soluble Color Packs * for easy mixing and eliminating airborne and spillage waste

Other Brand's

Features: Only 3 components (sand, cement and lime)

- Round sand * not interlocking and not any rocks

- Regular and not super clean sand
- Non Hydrophobic, not added polymers or any additional components
